

## Thermoelectric Mobile Charger

Stainless steel kettle

Aluminum "All in one"

The mobile Thermoelectric Generator/charger (TEG) is based on a Trangia\* storm-proof stove.

The TEG can be used with all types of heat sources: LPG, alcohol, kerosene, open log fire, log fired stoves...

- Electric power output: 9W with cool water and 4W with boiling water in the kettle.
- Kettle diameter: 160mm
- The "all in one" packs into a compact unit
- Electric connection: DC plug connector
- Optional adapter: DC-plug to car cigarette lighter socket
- Cellular phones and other units are charged via a cigarette lighter charger adapter connected to the TEG output
